PROFESSIONAL SUMMARY

Senior Consultant in Data Engineering with 5+ years of experience delivering cloud data platforms for financial-services programs. Project senior lead across ETL, reporting, analytics, and infrastructure while remaining hands-on in architecture and implementation. Combines technical leadership with hands-on Python, SQL, and PySpark delivery, turning ambiguous migration and reliability problems into production systems with clear controls and ownership. Work includes 40+ TB migrations, 70% shorter AWS Glue runtime, 65% lower storage costs, and 90x faster reconciliation.

TECHNICAL SKILLS

Languages & Processing: Python, SQL, PySpark, Apache Spark, Shell Scripting

AWS & Data Platforms: AWS Glue, Amazon S3, Redshift, Lambda, Step Functions, DMS, Lake Formation, MWAA, Airflow, SNS, RDS, Aurora PostgreSQL, EC2, IAM, CloudWatch, QuickSight

Data Engineering: ETL/ELT, Data Ingestion, Data Modeling, Data Warehousing, Medallion Architecture, Metadata-Driven Pipelines, Data Quality, Reconciliation, PII Masking, RBAC

Engineering Tools: Boto3, Git, GitHub, CI/CD, Docker

EDUCATION

Bachelor of Engineering in Computer Engineering

2016 - 2020

Babaria Institute of Technology

CGPA: 8.46/10

PROFESSIONAL EXPERIENCE

Senior Consultant - Data Engineering

Jun 2026 - Present

Deloitte

Pune, India

- Serve as project senior lead across ETL, reporting, analytics, and infrastructure for financial-services data programs, setting technical direction and coordinating delivery across workstreams.
- Designed an event-driven AWS data platform spanning on-premises ingestion, bronze and silver processing, analytics base tables, model-refresh triggers, and dashboards.
- Built audit and monitoring controls across the platform so teams could trace failures from ingestion through downstream reporting.
- Re-engineered AWS Glue and PySpark workloads, reducing measured runtime by 70%.
- Designed archival and manual data-capture frameworks for long-term retention and source-system gaps in downstream analytics.
- Established daily priorities and blocker reviews that helped the team deliver 30 use cases within the agreed timeline.
- Contributed technical RFP responses and on-site infrastructure assessments for cloud migration and modernization.

Consultant - Data Engineering
Deloitte

Oct 2023 - May 2026
Pune, India

- Designed full-load and incremental pipelines that moved 10+ TB from Oracle and 30 TB from a SAS warehouse to Amazon S3 in Parquet format, reducing the storage bill by 65%.
- Built deterministic PII-masking pipelines in AWS Glue and PySpark, preserving referential integrity and enforcing role-based access through AWS Lake Formation.
- Developed metadata-driven reconciliation across Oracle, Amazon S3, Amazon RDS, and Redshift using Aurora PostgreSQL rules and consolidated validation outputs.
- Orchestrated ingestion, masking, and reconciliation with AWS Step Functions, Lambda, Glue, and SNS, including dependency handling and automated alerts.
- Supported risk, finance, and data-mart modernization through architecture assessment, data modeling, and evaluation of ETL and integration tools.

Data Engineer
Infosys Ltd.

Jun 2021 - Sep 2023
Pune, India

- Modernized a reporting data-lake and analytics platform for a US financial-services program, migrating legacy data sources into AWS.
- Built Python ingestion and transformation services across EC2, Lambda, and S3, with batch orchestration in Amazon MWAA and Airflow.
- Developed production Airflow DAGs with deployment support, data-quality checks, and failure alerting.
- Automated same-account and cross-account Amazon QuickSight asset migration using reusable Python and Boto3 tooling.
- Built Python and SQL reconciliation tooling for schema and row-level validation, achieving a measured 90x improvement over the previous process.

INDEPENDENT PROJECT

AWS Cloud Migration - Client Website
Independent / Freelance

Sep 2025 - Oct 2025
Remote

- Migrated a production website from Heroku to AWS, containerizing frontend, backend, and database services with Docker and deploying versioned images through Amazon ECR and Lightsail.
- Reduced hosting costs by 50%, configured Route 53 for the domain cutover, and automated database and SSL certificate backups.

CERTIFICATIONS & ACHIEVEMENTS

- Received the Deloitte President Bonus in 2026.
- Promoted to Senior Consultant in June 2026.
- [AWS Certified Data Engineer - Associate](#)
- [AWS Certified Solutions Architect - Professional](#)
- [AWS Certified SysOps Administrator - Associate](#)
- [AWS Certified Developer - Associate](#)
